

Department of Engineering, De Anza College
ENGR D035-02. Statics (Spring 2018)

Instructor: Sathish Manickam, Ph.D
Email: sathish.manickam.school@gmail.com (or) manickamsathish@fhda.edu
Schedule MW 06.30-09.10 PM, Room: S75
Office Hours: 30 Minutes before and after each class (S-75) and/or by appointment
Course Materials: My Portal / Course Studio

Administrative Announcements

- 4 Units, Hours: 2.5 lecture, 2.5 hours laboratory (55 hours / quarter).
- General Education Status: Non-GE
- Program Status: Program Applicable
- Credit Status: Credit - Degree applicable
- Grading Method: Letter Grade
- Prerequisites: Engineering 10; Mathematics 1B; Physics 4A

Course Description (From Schedule of Classes)

Principles of statics as applied to particles and rigid bodies in two and three dimensions. Vector solutions for concentrated and distributed loads. Determination of centroids and moments of inertia and the effects of dry friction. Programming computer solutions.

Text

F.P. Beer, E.R. Johnston, Vector mechanics for engineers: Statics, 10ed., McGraw-Hill, 2012.

Alternate Texts

1. 7th, 8th or the 9th or more recent editions of Beer and Johnston's text cited above (or older versions of the books listed below). Library carries many copies of these books.
2. R.C. Hibbeler, Engineering Mechanics: Statics, 13th Edition, Prentice Hall, 2012.
3. J.L. Meriam and L.G. Kraige, Engineering mechanics: Statics, 7th Ed., John Wiley, 2012.
4. E.W. Nelson, C.L. Best and W.G. McLean, Schaum's Outline of Theory and Problems in Engineering Mechanics: Statics and Dynamics, 1997.
5. S. Timoshenko and D.H. Young, Engineering Mechanics, McGraw-Hill, 1954.

If you wish to follow any other book of similar content, please talk to me first.

Academic Integrity

Please note that if you were found cheating in exams, quizzes or homework, you will automatically receive zero points for that entire exam/homework/quiz, and that you will be reported to the Department. You will not be eligible for any makeup for the entire exam/homework/quiz. De Anza's Policy on Academic Integrity will be strictly followed.

Policy statement:

<http://www.deanza.edu/studenthandbook/academic-integrity.html>

Campus Policy on Disability

Class specific things may be obtained by contacting me or the department office. For campus wide resources, students may contact Disability Support Services (DSS) at:

<http://www.deanza.edu/dss/index.html>

Grading Policy

Homework (2×9) = 18%, Project = 14%, Quizzes (2×9) = 18%

Midterms (2×15) = 30%, and Finals = 20%.

A+ (100.0-95.0) A (94.9-90.0) A- (89.9 - 85.0) B+ (84.9-80.0) B (79.9-75.0)

B- (74.9-70.0) C (69.9-60.0) C-(59.9-55.0) D (54.9-50.0) F <50

Other Useful Information

1. No cell phones during class. Keep it on mute. Check only if necessary. If you are using ebooks (and devices), please use only those that are relevant to the class.
2. This course is highly interactive. To be successful, you must to read ahead, attend all classes, actively participate in discussions in class and work on the assignments and projects.
3. From the College's webpage: "De Anza offers a broad range of programs and services to help you succeed. Through peer advising, student mentoring, tutoring and more, we provide the support that you need to reach your educational goals." Make use of the opportunities available to you. For details, please see: <http://www.deanza.edu/academicssupport/>
4. Emails from students are always welcome. I will return your emails within 24 hours.
5. There will be a total of eight quizzes offered during the Quarter. All of them will be at the beginning of class. There will be no makeup offered for quizzes under any circumstances.
6. There will be two midterms offered for the class. Makeups for midterms are offered only if there is a documented emergency need (or if arranged at least a week in advance).

Department of Engineering, De Anza College
ENGR D035-02. Statics (Spring 2018) - Tentative Calendar

Week	Date	Topic	Read	Due
01	04/09	Course info. Introduction, Statics of Particles	001-074	
	04/11	Vectors, Parallelogram Law, Vector Resolution	001-074	Q-0
02	04/16	Forces in Space, Rigid Bodies, Moments	046-085	HW-1
	04/18	Vector products, Couples	085-157	Q-1
03	04/23	Equilibrium of Rigid Bodies - 2D	158-191	HW-2
	04/25	Equilibrium of Rigid Bodies - 3D	192-217	Q-2
04	04/30	Distributed Forces - Areas and Lines	218-258	HW-3
	05/02	Distributed Forces - Volumes	258-281	Q-3
05	05/07	Midterm Review	001-281	HW-4
	05/09	(Midterm -1, 1 hr), Trusses	282-314	
06	05/07	Trusses	282-314	Project - A
	05/09	Frames and Machines	314-351	Q-4
07	05/14	Forces in Beams	352-383	HW-5
	05/16	Forces in Cables	383-410	Q-5
08	05/21	Friction	411-467	HW-6
	05/23	Friction	411-467	Q-6
09	05/28	MEMORIAL DAY	--	--
	05/30	Moments of Inertia - Areas	468-510	HW-7
10	06/04	Moments of Inertia - Mass	510-554	Q7
	06/06	Midterm Review	282-554	HW-8
11	06/11	(Midterm - 2, 1 hr), Virtual Work	556-598	Q-8
	06/13	Virtual Work	556-598	HW-9
12	06/18	First Half Review	001-281	Q-9
	06/20	Second Half Review / Project submission	282-598	Project - B
13	06/27	Final Exam, Wednesday: 6:15-8:15 p.m		

Notes:

1. Reading assignments of the pages listed are from the course text. Read them before the class!
2. Quizzes each week will be based on the material covered in class during the previous week.
3. If you are using an alternate text, follow the topic descriptions shown and follow along.
4. Course schedule is subject to change with fair notice in class or via email.

Follow announcements, download homework and quiz solutions and discussions on Course-Studio.

Student Learning Outcome(s):

*The student will be able to analyze two- and three-dimensional force systems on rigid bodies in static equilibrium using vector and scalar analysis methods.
